## VISPRING

Luxury Beds - London 1901

### Traditional Bedstead

### Mattress

combines the most luxurious layers of Platinum Certified British wool that is ideal for a hygienic, cool refreshing sleeping surface with a hand nested pocket spring system that offers you comfort and support, helping you wake refreshed in the morning.

Mattress Tension - Soft, Medium, Firm or Extra Firm.

1254 Hand Nested Pocket Springs – Each spring is enclosed in a natural cotton calico pocket to ensure excellent breathability and offering a more precise and body-responsive support.

Hand Teased Fillings – The traditional craft of gently separating fibres by hand enhances the inherent attributes of natural fillings. This meticulous process ensures an even distribution of fillings, giving an opulent feel. This process gives resilience and loft to the fillings to allow the air to move freely and the bed to breathe.

Upholstery - Made exclusively from natural fillings: wool spring protector pad, bonded British fleece wool and cotton, blended British fleece wool and cotton.

2 Rows of Genuine Hand Side Stitching – Traditional hand-side stitching which secures the outer springs to the border at the top and bottom preventing roll-out and is the most highly skilled and labour intensive of all the operations. Hand-Tufted with Felt Washers – The traditional method of mattress upholstery where the fillings are secured by hand with tufts from the top of the mattress to the bottom to ensure all loose fillings are secured to provide the perfect finish. Flag-stitched Handles – Handles on all sides for ease of positioning. Air Vents – Chrome vents to allow good air circulation, regulate temperature and keep the mattress fresh.

Seasonal Turn – This Vispring mattress should be turned 'Seasonally' once every 3-4 months. With fillings on both sides, this mattress offers two possible sleeping surfaces together with an enhanced level of comfort. Turning will enable the fillings to settle more evenly and improve the ventilation of your mattress ensuring the life of your mattress will be prolonged.

*RECOMMENDED for your new mattress - The Vispring Bedstead mattress pad provides protection between your Vispring mattress and the base of your bedstead. The pad is made from wool and helps to prolong the life of both mattress and bedstead.*

*The pad attaches to the bedstead with string ties. The pad itself helps to reduce friction against the slats and prevents splinters entering the mattress surface.*
