**Product and ordering information**

Model available in price groups 8, 10, D, H, J, M, T and X -

Please refer to our current fabric/leather collection for the fabric/leather selection.

**STRUCTURE:**

Frame: Load-bearing parts of the frame made of solid wood and wood materials, surfaces lined with padded cover.

Seat: Spring system with permanently elastic steel sinuous springs and upper-side cover.

Seat cushions with a core of PUR foam (at least RG 35). Seat covered with a ticking (filled with high-quality filling materials which may contain an admixture of feathers in accordance with the requirements of BS 5852). Cover made of cotton wadding.

Especially light upholstery is distinguished by its highly soft surface. In new condition, the covers exhibit a pronounced wave pattern purposefully based on the design and structure. The upholstery will adjust to the shape of the body and the firmness of the seat will give a little bit.

Minor differences in seat firmness with add-on units are design-based and are therefore not a cause for complaint.

Back: Loose back cushions with a ticking (filled with high-quality filling material which may contain an admixture of feathers, in accordance with the requirements of BS 5852)

Chamber cushions: This model features high-quality chamber cushions. The filling material is held in chambers within the cushions to prevent it from shifting.

The chambers and the filling material can stand out more or less depending on the type and thickness of the cover material. In order to prevent the filling material from bulging, these seat and back cushions should be plumped up, just like you do with pillows.

Seat depths: Seat depth 1 (ST1) = 64 cm or seat depth 2 (ST2) = 84 cm - please always mention the seat depth with your order -

**A mixture of the different seat depths is possible! A mixture for combinations with a corner element is possible by using the "combination corner" (NOT possible with the angular corner)!**
