A3

All configurations available in all arm options.

With the Stressless® Anna sofa, you will have full freedom to select motorised and manual modules side by side. When the motorised function is selected, a footrest smoothly extends under your feet. The motorised headrest follows, and provides you with the optimal position for relaxation with your feet up. On the manual seat, you regulate the position with your hands. With the headrest in a collapsed position, the sofa appears visually smaller. In the raised position it offers good head support and transforms a low-back sofa into a high-back.
