

himolla Loona Riser Recliner

Designed to seamlessly resemble a standard recliner, with a perfectly hidden mechanism for the lift function. When the lift function is activated, the chair locks the swivel action while progressively lifting the entire chair to the user's chosen height.

The controller for the Loona is kept on the user's right side as standard and uses a magnetised holster to keep the control in the perfect position. This chair includes a power supply to run on a power outlet, with the option of a removable battery that connects in place of the power cable at the rear of the chair.

Size
