

Carter riser recliner chair with knuckle arms

The Carter Knuckle range has been ergonomically designed for optimum comfort and support.

The soft, fibre-filled back includes lateral support cushions in addition to a supportive headroll. The design features comfortable 'chaise' seating and smooth Light Oak or Dark Beech knuckles. Choose the LUMBAR ADJUSTMENT option for individual comfort and support. The Petite size is especially designed with a shallower seat and a lower seat height for the smaller user.

- Designed with full powerlift facility to assist sufferers of arthritis, rheumatism, MS, poor circulation and many other mobility restrictions
- PERSONAL 5 YEAR GUARANTEE on all Recliner actions, frames, motors, handsets and all other electrical parts
- Optional LUMBAR ADJUSTMENT for added comfort
- Single-use Emergency Back-up fitted as standard and Multi-use Battery Back-up available at extra cost
- Supplied with castors for ease of movement. Front castors lift away to ensure stability in raised positions. Glides now available as an alternative to castors for solid flooring
- Supplied with removable back to make the task of delivering the Recliner into your home so much easier

The sophisticated Dual Motor mechanism enables you to control the backrest and footrest independently to reach the exact position you want including a near-horizontal full sleeping position (needs a 38cm (15") gap from the wall).
