Space Manual Integrated 2400

The Space Manual Integrated range balances contemporary sophistication with exceptional comfort. Its sleek silhouette, wrapped entirely in fabric or leather upholstery, comes with a choice of striking back and arm designs that brings Norwegian style to any room in your home. Whichever design you choose the attention to detail is the same, from a back and footrest that operate independently, an adjustable headrest pillow, to ultra-supportive cold cure moulded foam cushioning delivering uninterrupted comfort that lasts.

BENEFITS

Luxurious feel

For extra comfort, we've added a layer of soft high resilient polyurethane foam with fibres for a luxurious feel.

'Just right' headrest

Support your head and neck in the perfect position by fine-tuning the angle of the headrest with our unique adjustable system.

360° Swivel

Effortlessly rotate the chair in either direction, with the peace of mind of absolute stability, thanks to our smooth 360-degree swivel mechanism.

Adjustable reclining backrest

Effortlessly recline and change the back angle to suit your needs, locking it into place at your preferred position with our smooth gas-lift reclining system.

Lean back and stretch out

Relax without having to release the footstool thanks to the unique independent back and footrest system. A slight push on the arm, and the footrest unfolds smoothly. When you want to close the footrest just lean forward slightly, and effortlessly push the footrest down and in.

Cold-Cure Foam Cushioning

For lasting comfort and durability, this space-age material, encasing the recliner steel frame and springs, is moulded to create a contoured silhouette, that holds its shape for the lifetime of the foam. Ensuring better ergonomic support for your body giving comfort that lasts.

Customise to your style

Get your perfect look by selecting from a choice of leather, fabric and wood finishes to suit your home and style.

Norwegian quality

All IMG products meet the highest Norwegian quality standards. From the reclining mechanism with integrated footrest, to the construction based on a hard wood and steel frame encased with our unique moulded foam.
