DUAL AND TRI (Cloud Comfort) motor options available

Dual Motor actions both lift and tilt the Recliner forwards so that getting in and out is the easiest thing imaginable. This full powerlift facility is designed to assist sufferers of arthritis, rheumatism, MS, poor circulation and many other mobility restrictions.

The sophisticated Dual Motor mechanism enables you to control the backrest and footrest independently to reach the exact position you want including a near-horizontal full sleeping position (needs a 38cm (15") gap from the wall).

The versatile Tri-Motor Cloud Comfort mechanism allows independent movement of the backrest and footrest to reach your desired position, then the third motor allows you to tilt the chair when sitting or reclined to relieve the stresses on your body for that extra dimension of comfort you deserve (needs a 46cm (18") gap from the wall).

Features & Dimensions

- Designed with full powerlift facility to assist sufferers of arthritis, rheumatism, MS, poor circulation and many other mobility restrictions
- Optional HEAD TILT and/or LUMBAR ADJUSTMENT for added comfort
- PERSONAL 5 YEAR GUARANTEE on all Recliner actions, frames, motors, handsets and all other electrical parts
- Single-use Emergency Back-up fitted as standard and Multi-use Battery Back-up available at extra cost
- Supplied with castors for ease of movement. Front castors lift away to ensure stability in raised positions. Glides now available as an alternative to castors for solid flooring
- Supplied with removable back to make the task of delivering the Recliner into your home so much easier
- Maximum recommended weight 160kg (25 stone)
